

**Anti slip treatment for tiles**  
**£120.00 including delivery - excluding vat**

- / An easy-to-use, economical and proven anti slip treatment that addresses the problem caused by slippery-when-wet tile floors and enamel or porcelain bathtubs.
- / Creates an "Invisible Tread" on tile floors and enamel or porcelain bathtubs that significantly increases the co-efficient of friction and reduces the problem of slippery-when-wet surfaces.
- / The Treatment works on natural unsealed mineral floors, such as ceramic, porcelain, quarry tile, granite, mosaic tile, slate, terrazzo, etc.
- / Typically lasts for years with one application.
- / It may be used indoors and outdoors.
- / The wetter the floor the more effective the slip-resistance.
- / Ready to use. Quick and easy to apply.
- / Supplied with detailed instructions for use.
- / Packaged for smaller projects. 1 liter will slip treat approximately 100 sq. ft. (10 square meters) or 8 enamel or porcelain bathtubs, or a combination of both.
- / Cost effective way to solve a big problem.

**Anti slip epoxy spray**  
**£42.50 including delivery (excluding vat)**

- / Cures to a hard slip resistant textured finish.
- / Adheres to fibreglass, wood, steel, concrete and other surfaces where a slip resistant finish is desired.
- / Suitable for steps, ramps, bathtubs, boat decks, diving boards, snowboards, skateboards, surfboards and other sport surfaces where increased traction is needed. Ideal for coating concrete, wood, and acrylic surfaces.
- / Self priming on most surfaces.
- / Quick drying. For use indoors and outdoors.
- / One 12 oz. aerosol covers up to 24 square feet.

Please Note: Clear does not have the slight amber hue that our clear epoxy has. However always pretest to ensure satisfaction before proceeding.
